GENERAL STUDIES II

Global Shipping Slowdown 2026: India's Maritime Trade

Faculty/Author: Faculty Editorial Board
Date: 27 November 2026
Platform: Civil Service Gurukul Research Wing
Reading Time: 5 Mins

Amid reports of slowing global shipping growth, India's relatively stronger maritime activity presents potential opportunities for economic growth, export competitiveness and global supply-chain integration. However, geopolitical disruptions, rising logistics costs, energy import dependence and environmental challenges remain significant concerns. Civil Service Gurukul examines India's maritime infrastructure, port modernisation, Sagarmala Programme, international shipping regulations and sustainable maritime development from the UPSC Prelims and Mains perspective.

CIVIL SERVICE GURUKUL
www.civilservicegurukul.com

Current Affairs – Executive Summary

Reports of slowing global shipping growth alongside relatively stronger Indian maritime activity have renewed discussion about India's potential as a global maritime trade hub. Port modernisation, multimodal logistics, coastal shipping and sustainable maritime infrastructure could strengthen India's economic resilience. However, geopolitical disruptions, freight costs, energy dependence and environmental challenges require a balanced policy response.

Maritime Trade

GS III

1. Why Is the Global Shipping Slowdown in the News?

The newspaper edition of 27 November 2026 reportedly highlighted slowing growth in global shipping alongside relatively stronger Indian shipping activity.

The development raises important questions about India's maritime competitiveness, port infrastructure, export potential and ability to withstand external economic shocks.

> **Important Current Affairs Clarification:**
> The reported trend does not establish a quantified official growth forecast for every shipping route, cargo category or Indian port. Statements regarding zero growth or India's outperformance require a defined reporting period, comparable indicators and verified datasets.

2. What Is Maritime Trade?

Maritime trade refers to the international and domestic transportation of goods through seas, oceans and navigable waterways.

It connects producers, consumers, industrial centres and global markets through shipping networks, ports and logistics infrastructure.

Importance of Maritime Trade

- Facilitates international merchandise trade.
- Supports energy imports and industrial raw material supplies.
- Connects domestic industries with global markets.
- Generates employment in shipping, logistics and port operations.
- Supports manufacturing and export competitiveness.
- Strengthens participation in global value chains.

3. Major Causes of a Global Shipping Slowdown

Factor	Potential Impact
Weak Global Demand	Reduced international cargo movement.
Trade Protectionism	Tariffs and restrictions may reduce trade volumes.
Geopolitical Conflicts	Disruption of shipping routes and higher insurance costs.
Energy Price Volatility	Higher vessel operating expenses.

CIVIL SERVICE GURUKUL
www.civilservicegurukul.com

Factor	Potential Impact
Port Congestion	Longer delivery schedules and increased logistics costs.
Supply-Chain Restructuring	Changes in traditional trade routes and cargo demand.
Environmental Regulations	Investment requirements for cleaner vessels and fuels.

These are general economic mechanisms that may influence global shipping activity. Their relative contribution to the reported slowdown requires independent assessment.

4. Important Maritime Performance Indicators

Shipping growth cannot be evaluated using a single indicator. Physical cargo movement, freight prices, vessel efficiency and financial performance measure different aspects of maritime activity.

Indicator	Meaning
Cargo Throughput	Quantity of cargo handled by a port during a specified period.
Container Throughput	Volume of containers handled, commonly measured in TEUs.
TEU	Twenty-foot Equivalent Unit, a standard measure of container capacity.
Vessel Calls	Number of vessel visits to a port.
Freight Rate	Price charged for transporting cargo.
Vessel Turnaround Time	Duration a vessel spends in port from arrival to departure.
Cargo Dwell Time	Time cargo remains within a port or terminal before onward movement.
Seaborne Trade	Trade transported through maritime routes.

UPSC Prelims Memory Capsule:

TEU ? Container capacity

Turnaround Time ? Vessel efficiency

Dwell Time ? Cargo movement efficiency

Freight Rate ? Transportation price

Throughput ? Cargo volume

5. Why India's Maritime Trade May Perform Differently

India's maritime sector may demonstrate resilience even during periods of weak global shipping growth because domestic economic conditions and infrastructure developments do not necessarily follow global trends.

Potential Growth Drivers

- Expansion of domestic manufacturing and consumption.

CIVIL SERVICE GURUKUL
www.civilservicegurukul.com

- Port modernisation and capacity augmentation.
- Improved road and railway connectivity.
- Export market diversification.
- Development of coastal shipping.
- Integration with international supply chains.
- Digitalisation of port and customs procedures.

Nevertheless, stronger cargo traffic does not automatically indicate higher profitability, lower logistics costs or improved productivity.

6. Constitutional Framework of Indian Ports

Constitutional Provision	Subject
Article 246	Distribution of legislative power between the Union and States.
Union List Entry 27	Ports declared to be major ports by or under parliamentary law.
Concurrent List Entry 31	Ports other than those declared to be major ports.
Union List Entry 25	Maritime shipping and navigation, including shipping and navigation on tidal waters.

Important UPSC Fact:
Major ports fall within Union legislative jurisdiction. Ports other than major ports are included in the Concurrent List and are generally administered through State-level arrangements.

7. Major Government Initiatives for Maritime Development

Initiative	Major Objective
Sagarmala Programme	Port-led development, modernisation, connectivity and coastal community development.
Maritime India Vision 2030	Improving India's maritime infrastructure, competitiveness and operational efficiency.
Maritime Amrit Kaal Vision 2047	Long-term transformation of India's maritime sector.
PM Gati Shakti	Integrated infrastructure planning and multimodal connectivity.
National Logistics Policy	Improving logistics efficiency, integration and competitiveness.
Jal Marg Vikas Project	Development of navigation capacity on National Waterway 1.
Harit Sagar Guidelines	Promotion of environmentally sustainable port operations.

8. Sagarmala Programme and Port-Led Development

The Sagarmala Programme was approved in 2015 to promote port-led development by leveraging India's coastline, navigable waterways and strategic maritime location.

CIVIL SERVICE GURUKUL
www.civilservicegurukul.com

Major Components

- Port modernisation and new port development.
- Port connectivity enhancement.
- Port-linked industrialisation.
- Coastal community development.
- Promotion of coastal shipping and inland waterways.

> **Economic Significance:**
> Efficient ports and improved hinterland connectivity can reduce cargo handling delays, improve supply-chain reliability and strengthen India's export competitiveness.

9. International Maritime Organization (IMO)

The International Maritime Organization is a specialised agency of the United Nations responsible for developing international standards relating to shipping safety, security and environmental performance.

Particulars	Details
Full Form	International Maritime Organization
Headquarters	London, United Kingdom
Founding Convention	Adopted in 1948
Convention Entered into Force	1958
Institutional Status	Specialised agency of the United Nations
Major Responsibilities	Maritime safety, security and prevention of pollution from ships.

Important International Maritime Conventions

- **SOLAS:** International Convention for the Safety of Life at Sea.
- **MARPOL:** International Convention for the Prevention of Pollution from Ships.
- **STCW:** International Convention on Standards of Training, Certification and Watchkeeping for Seafarers.

10. Strategic Maritime Routes and Chokepoints

Maritime Chokepoint	Geographical and Economic Importance
Strait of Hormuz	Connects the Persian Gulf with the Gulf of Oman and is important for energy transportation.
Bab-el-Mandeb Strait	Connects the Red Sea with the Gulf of Aden.
Suez Canal	Connects the Mediterranean Sea with the Red Sea.

CIVIL SERVICE GURUKUL
www.civilservicegurukul.com

Maritime Chokepoint	Geographical and Economic Importance
Strait of Malacca	Important maritime passage between the Indian Ocean and the western Pacific region.
Panama Canal	Connects the Atlantic and Pacific oceans.
Cape of Good Hope Route	Alternative maritime passage around southern Africa.

Disruptions at strategic maritime passages can increase transportation distances, fuel consumption, insurance premiums and delivery delays.

11. Impact of Shipping Disruptions on Indian Business

Economic Transmission Mechanism

Maritime Disruption ? Longer Shipping Routes ? Higher Freight and Insurance Costs ? Increased Working Capital Requirements ? Pressure on Export Margins and Consumer Prices

Illustrative Economic Example

Particulars	Normal Conditions	Disrupted Conditions
Shipment Value	?10,00,000	?10,00,000
Freight Cost	?50,000	?80,000
Insurance Cost	?10,000	?15,000
Total Freight and Insurance	?60,000	?95,000
Additional Logistics Cost	—	?35,000

Note: These figures are hypothetical and are provided only to explain the economic impact of shipping disruptions. They do not represent actual November 2026 freight rates.

12. Blue Economy and Sustainable Maritime Development

The blue economy refers to the sustainable use of ocean resources for economic growth, improved livelihoods and employment while preserving marine ecosystems.

Major Components of the Blue Economy

- Maritime transport and port services.
- Marine fisheries and aquaculture.
- Coastal tourism.
- Offshore renewable energy.
- Marine biotechnology.

CIVIL SERVICE GURUKUL
www.civilservicegurukul.com

- Marine ecosystem conservation.

India's maritime growth strategy must balance economic development with marine biodiversity protection, pollution prevention and the welfare of coastal communities.

13. Green Shipping and Maritime Decarbonisation

Green shipping involves reducing the environmental footprint of maritime transportation through cleaner fuels, energy-efficient vessels, improved operational practices and sustainable port infrastructure.

Green Shipping Measure	Potential Benefit
Green Hydrogen and Derivative Fuels	Potential reduction in lifecycle emissions when sustainably produced.
Shore Power	Allows compatible vessels to use shore-based electricity while berthed.
Renewable Energy at Ports	Reduces dependence on fossil-based electricity.
Energy-Efficient Vessel Design	Improves fuel efficiency.
Digital Route Optimisation	May reduce unnecessary travel and fuel consumption.
Waste and Pollution Management	Protects coastal and marine ecosystems.

14. Opportunities and Challenges for India

Opportunities	Challenges
Port-led industrial development.	Geopolitical disruptions.
Export market diversification.	Freight and insurance cost volatility.
Expansion of coastal shipping.	Dependence on imported energy.
Integration into global value chains.	Infrastructure and connectivity gaps.
Employment and skill development.	Environmental degradation.
Green shipping technologies.	High capital investment requirements.
Digital port management.	Cybersecurity and operational risks.

15. Way Forward: Strengthening India's Maritime Competitiveness

Port Modernisation

Improve cargo handling capacity, automation, vessel turnaround and operational reliability.

Multimodal Logistics

Integrate ports with railways, highways, inland waterways and dedicated freight corridors.

CIVIL SERVICE GURUKUL
www.civilservicegurukul.com

Coastal Shipping

Promote commercially viable coastal cargo transportation to diversify domestic logistics options.

Trade Diversification

Expand access to alternative export markets and reduce excessive dependence on individual trade routes.

Maritime Security

Strengthen international cooperation, maritime surveillance and resilient route planning.

Green Maritime Infrastructure

Promote cleaner fuels, renewable energy, energy-efficient operations and marine ecosystem protection.

Performance-Based Governance

Evaluate port development through cargo-specific throughput, dwell time, vessel turnaround, logistics costs and environmental indicators rather than cargo volume alone.

16. UPSC Prelims Quick Revision Capsule

Keyword	Remember
Sagarmala	Port-led development
IMO	UN specialised agency for shipping
IMO Headquarters	London
TEU	Twenty-foot Equivalent Unit
SOLAS	Safety of life at sea
MARPOL	Prevention of pollution from ships
Union List Entry 27	Major ports
Concurrent List Entry 31	Ports other than major ports
PM Gati Shakti	Integrated infrastructure planning
Blue Economy	Sustainable use of ocean resources
Vessel Turnaround Time	Duration of vessel stay in port
Cargo Dwell Time	Duration of cargo stay at a terminal

CIVIL SERVICE GURUKUL
www.civilservicegurukul.com

17. UPSC Prelims Practice MCQs

Question 1

Which of the following indicators measures the duration a vessel spends in a port?

A. Fiscal deficit

B. Vessel turnaround time

C. Consumer price inflation

D. Exchange rate volatility

Reveal Answer and Explanation

Correct Answer: B – Vessel Turnaround Time

Vessel turnaround time measures the duration of a vessel's stay in port and is an important indicator of operational efficiency.

Question 2

Consider the following statements regarding the International Maritime Organization:

1. It is a specialised agency of the United Nations.
2. Its headquarters is located in London.
3. It determines the monetary policies of member countries.

Which of the statements given above are correct?

A. 1 and 2 only

B. 2 and 3 only

C. 1 and 3 only

D. 1, 2 and 3

Reveal Answer and Explanation

Correct Answer: A – 1 and 2 only

IMO deals with international shipping safety, security and environmental standards. It does not determine national monetary policies.

Question 3

Consider the following pairs:

1. SOLAS – Maritime safety.

CIVIL SERVICE GURUKUL
www.civilservicegurukul.com

2. MARPOL – Prevention of pollution from ships.
3. Sagarmala – Port-led development.

How many of the above pairs are correctly matched?

A. Only one
B. Only two
C. All three
D. None

Reveal Answer and Explanation

Correct Answer: C – All three
SOLAS concerns maritime safety, MARPOL addresses pollution from ships, and Sagarmala promotes port-led development in India.

Question 4

Which of the following connects the Red Sea with the Gulf of Aden?

A. Strait of Hormuz
B. Strait of Malacca
C. Panama Canal
D. Bab-el-Mandeb Strait

Reveal Answer and Explanation

Correct Answer: D – Bab-el-Mandeb Strait
Bab-el-Mandeb connects the Red Sea and Gulf of Aden and forms an important passage for maritime trade through the Suez Canal route.

Question 5

Which of the following measures can strengthen India's maritime competitiveness?

1. Improvement in port turnaround time.
2. Development of multimodal freight connectivity.
3. Promotion of sustainable shipping technologies.
4. Increasing dependence on a single shipping route.

A. 1 and 2 only
B. 2 and 4 only

CIVIL SERVICE GURUKUL
www.civilservicegurukul.com

C. 1, 2 and 3 only

D. 1, 2, 3 and 4

Reveal Answer and Explanation

Correct Answer: C – 1, 2 and 3 only

Port efficiency, multimodal connectivity and sustainable technologies improve competitiveness. Excessive dependence on one shipping route increases vulnerability.

18. UPSC Mains Practice Question

GS Paper III – Infrastructure, External Sector and Economic Development

Question: Evaluate the opportunities and challenges for India's maritime sector amid slowing global shipping growth. Discuss the role of port modernisation, multimodal connectivity and sustainable maritime development in strengthening India's economic resilience.

Marks: 15 | **Word Limit:** 250 words

Reveal Model Answer

Introduction

Maritime trade plays a vital role in India's external sector, energy security and industrial development. A slowdown in global shipping presents challenges but may also create opportunities for India to strengthen its maritime competitiveness.

Opportunities

- Port-led industrial development through Sagarmala.
- Expansion of manufacturing and export capabilities.
- Integration into global value chains.
- Development of coastal shipping and inland waterways.
- Employment generation and green technology adoption.

Major Challenges

- Geopolitical disruptions and maritime security risks.
- Volatility in freight, insurance and fuel costs.
- Infrastructure and hinterland connectivity gaps.
- Dependence on imported energy.

CIVIL SERVICE GURUKUL
www.civilservicegurukul.com

- Environmental degradation and decarbonisation costs.

Way Forward

- Modernise ports and improve operational efficiency.
- Strengthen multimodal connectivity through integrated infrastructure planning.
- Diversify export markets and maritime routes.
- Promote cleaner fuels and sustainable port operations.
- Improve data-driven governance and maritime security cooperation.

Conclusion

India's maritime strategy must focus on efficiency, resilience and sustainability rather than cargo growth alone. Coordinated infrastructure development, competitive logistics and environmental responsibility can strengthen India's position in global maritime trade while supporting inclusive economic development.

19. UPSC Syllabus Mapping

UPSC Paper	Relevant Topic
Prelims GS Paper I	Economy, Geography and International Organisations.
Mains GS Paper I	World geography, maritime routes and distribution of resources.
Mains GS Paper II	International institutions and maritime cooperation.
Mains GS Paper III	Infrastructure, ports, logistics, external sector and environmental sustainability.
Mains GS Paper IV	Environmental ethics and sustainable resource management.
Essay	Blue economy, globalisation and sustainable development.
Interview	India's maritime strategy and global trade challenges.

20. Frequently Asked Questions

What is the global shipping slowdown?

It refers to weaker growth in maritime transportation or related shipping indicators during a specified period. Its magnitude depends on the indicator and dataset used.

Why might India's maritime trade outperform global trends?

Domestic demand, infrastructure development, manufacturing growth and export diversification may support relatively stronger maritime activity.

CIVIL SERVICE GURUKUL
www.civilservicegurukul.com

What is the Sagarmala Programme?

Sagarmala is an Indian government initiative promoting port-led development, port connectivity, industrialisation and coastal community development.

What is the full form of IMO?

International Maritime Organization.

Where is the headquarters of IMO?

London, United Kingdom.

What is TEU in shipping?

TEU stands for Twenty-foot Equivalent Unit and is a standard measure of container capacity.

What is the difference between cargo dwell time and vessel turnaround time?

Cargo dwell time measures how long cargo remains at a terminal, while vessel turnaround time measures how long a ship stays in port.

Does higher port traffic benefit every Indian exporter?

Not necessarily. Exporter profitability depends on freight rates, cargo type, market demand, operating costs and route-specific risks.

What is the blue economy?

The blue economy involves sustainable utilisation of ocean resources for economic growth, employment and improved livelihoods while protecting marine ecosystems.

Why is maritime trade important for UPSC?

It connects Indian economic development, infrastructure, international relations, geographical chokepoints, energy security and environmental sustainability.

21. Conclusion

The reported global shipping slowdown highlights the importance of developing a resilient and competitive maritime sector. India's relatively stronger shipping activity may offer opportunities for economic expansion, but higher cargo volumes alone cannot guarantee sustainable growth.

Port modernisation, multimodal logistics, export diversification, maritime security and green shipping must form the foundation of India's long-term maritime strategy.

CIVIL SERVICE GURUKUL
www.civilservicegurukul.com

By integrating economic competitiveness with environmental responsibility and efficient governance, India can strengthen its position in global maritime trade and contribute to sustainable national development.
